

## May Blooms At the Crosby Arboretum!

### In and Around the Bog

Common Name	Species	Structure of Interest
Parrot Pitcher Plant	<i>Sarracenia psittacina</i>	Solitary, red, nodding flowers. Leaves laying along the surface of the ground, green with red veins.
Orange Candyroot	<i>Polygala lutea</i>	Small plant with flower clusters consisting of small orange flowers.
Rose Pogonia	<i>Pogonia ophioglossoides</i>	One the three terminal flowers. Pink to white with a fringed lip. Fragrant.

### In and Around Beaver Pond

Common Name	Species	Structure of Interest
Mt. Laurel	<i>Kalmia latifolia</i>	Cluster of pink umbrella-shaped flowers with prominent stamens that are initially inserted into the petals and eject upon maturity.
Big Leaf Magnolia	<i>Magnolia macrophylla</i>	Very large leaves occurring in clusters at the ends of stems; flowers large, showy and very fragrant.
Southern Magnolia	<i>Magnolia grandiflora</i>	Large dark, green leaves with reddish hairs on the undersides. Flowers white, showy and very fragrant.
Tulip Poplar	<i>Liriodendron tulipifera</i>	Lobed leaves with truncate bases. Yellowish green flowers with orange rings near base.
Persimmon	<i>Diospyros virginiana</i>	White bell-shaped flowers along the leaf axils.
Snowbell	<i>Styrax grandifolia</i>	White, tubular flowers that occur on the undersides of twigs.
Water Lily	<i>Nymphaea odorata</i>	Aquatic plant with white many-petaled flowers. Numerous yellow stamens are found in the centers.
Cow Lily	<i>Nuphar luteum</i>	Aquatic plant with yellow, globular flowers.
Titi	<i>Cyrilla racemiflora</i>	Shrub to small tree. Drooping flower clusters with small, white flowers.

Pickerelweed

*Pontederia cordata*
